

Britannia Kitchen Ventilation

Capturestream CS3R

Extract with Reduced Front Supply, spot cooling, induction supply

Britannia Capturestream 'CS3R' Canopies offer total control over make-up air by providing diffused air to the front, spot cooling and the patented 'Capturestream' of air across the canopy from the front and two sides for superior performance through intelligent design and world-class baffle filter technology, all contributing to lower exhaust air rates.

Capturestream CS3R models with induction supply across the canopy suit those installations where reduced height is required and ultimate performance is paramount.

BRIEF SPECIFICATIONS

MINIMUM DIMENSIONS (PER SECTION):	1.0 D x 1.2 L
MAXIMUM DIMENSIONS:	1.80 D x Unlimited Length
STANDARD HEIGHT:	490mm at rear reducing to 250mm at the front
EXHAUST/ INLET SPIGOTS:	1 per 2.5m
FILTERS (SUPERSTREAM):	350 x 500mm Stainless Steel
POWER REQUIREMENT:	10A GPO
LIGHTING:	LED LIGHTS
CONSTRUCTION:	#304 S/STEEL 0.9MM, SEAMLESS POLISHED SURFACES

Further details and project specific estimates available on request.
